FORENOON ON STOCK EXCHANGE

Market Opened Weak and Sales Were Light.

DALY-WEST SELLS AT \$39.

Lower Mammoth Some Stronger-Victor Con. Remains Low - Wabash And New York-Quotations.

The week opened with the sale during the regular call of the Mining Exchange of 1,850 shares for \$1,444.75; while on the open board, 4,532 shares transferred for \$6,739; making the total business of the forenoon, 6,382 shares, for which was checked out the sum of \$8,183.75.

The eastern markets opened weak and naturally, had an effect at home. Daly-West was pulled down to \$39 on the open board. Lower Mammoth, however, maintained its support, and the market for it strengthened. New York Bananza, was also quoted higher. Wabash held firm. Star Consolidated and Victor Con., held around Satur-The closing quotations and sales of

THE MAJESTIC SMELTER.

Lead Furnaces Goes Into Commission Early in August. The lead furnace of the Majestic

during the month of August, says the Milford Times, and thenceforth is expected to be kept in continuous opera-tion, treating 100 tons of the Harrington-Hickory silver-lead ores every day The development of this property has reached such a stage, and ore bodies of such large extent have been opened up that the management has no doubt of its ability to keep the lead furnace running at its full capacity from this running at its full capacity from this mine alone. Manager Farish, in his report several months ago, stated that the ore then exposed in the Harrington-Hickory would keep the lead furnace supplied for a year and a half, the ore carying from 20 to 35 ounces silver and 20 to 35 per cent lead. There are also good bodies of a much higher grade. Connections recently made give the company 500 or 600 feet of stopling ground which will be added to as additional control of the company 500 or 600 feet of stopling ground which will be added to as additional control of the company 500 or 600 feet of stopling ground which will be added to as additional control of the company 500 or 600 feet of stopling ground which will be added to as additional control of the company 500 or 600 feet of stopling ground which will be added to as additional control of the company 500 or 600 feet of stopling ground which will be added to as additional control of the company 500 or 600 feet of stopling ground which will be added to as additional control of the company feet of stopling ground which will be added to as additional control of the company feet of stopling ground which will be added to as additional control of the company feet of stopling ground which will be added to as additional control of the company feet of stopling ground which will be added to as additional control of the company feet of stopling ground which will be added to as additional control of the company feet of stopling ground which will be added to as additional control of the company feet of stopling ground which will be added to as additional control of the company feet of stopling ground which will be added to as additional control of the company feet of stopling ground which will be added to as additional control of the company feet of stopling ground which will be added to as additional control of the company feet of stopling ground which will be added to as additional control of the company feet of stopling ground which will be added to a stopling ground which ground, which will be added to as additional levels are opened. Then there are thousands of tons of second class ore on the dumps that can be handled by the smelter at a profit, so there will be no question about the ore supply.

For the present the ore will be transported to the smelter by teams, a train or railroad to be put in later. As the e is but four and a half miles from smelter, with a smooth down grade haul all the way, the ore can be handled very cheaply, even by team. It is thought that the cost will not exceed 60 cents per ton. Twelve ore bins are being built at the smelter, so arranged that ore can be dumped into them from the wagons, the bins already built having been designed to take the ore from cars on the elevated track. Ore bins are also being built at the

It is the intention to start up the furnace just as soon as the dust flues are completed, this being the only unfinished work. The exact date cannot be fixed now, but the important event will occur some time next month. The start will be made by the Colorado Iron Works, builder of the plant which is bound undee its contract to turn the on. An expert smelter man will robably be sent over to take charge. It is expected that the starting of the ead furnace will be followed at no dis-ant date by the blowin gin of the big 0-ton copper furnace, although the iblic cannot realize the amount of la

ditional number of men, both at the smelter and the mine, in addition to the large number of teams to be employed, and a period of increased activity may be looked for. add concentrates

DISCHARGES SIXTY MEN. Mammoth Mining Company Practically Ceases Operations.

Mammoth, Utah, July 12.—Of the 75 men employed at the Mammoth mine, 60 came back with their lunch buckets and time checks this morning, owing it is said, to a disagreement between the company and the smelters. For that reason the Mammoth Mining company has seen fit to discontinue operations, retaining only 15 men; barely enough to keep the workings intact unil the way can be made clear to restor he property to satisfactory paying

Inquiry made at the offices of the Mammoth Mining company this fore-noon elicited the information that there is no trouble whatever between the

ompany and the smelters.

It is said that President McIntyre had other reasons for letting out this large force; chiefly among which it is laimed, was the unsatisfactory service endered by the men.

VISITED THE CACTUS. Salt Lake Route Officials Returned This Forenoon.

The railroad officials consisting of General Manager Wells and Auditor F K. Rule, of the Salt Lake Route, who accompanied Samuel Newhouse and his local managers, M. M. Johnson and A. J. Buttles, to the Cactus mines in Beavers county on Saturday night, returned this morning. Mr. Newhouse and his men also came home.

The object of the trip by the railway officials at this time, it is said, was for the purpose of acquainting themselves with conditions at the great copper property in the south. Mr. Newhouse being about ready to commence the con struction of the gigantic concentrator and smeller for the Cactus mine, must have railroad connections; so in all probability steps will be taken to ex-tend the line from Frisco at on early

date.

The surveys for the line were made by the Oregon Short Line several weeks before it became a certainty that the Salt Lake Route would take over the

Mono Mill Running.

The Mono mill in Dry Canyon is in operation again. President G. A. Land states that the plant has undergone an overhauling and has been at last adjusted to the ores of the camp. Supt E. W. Clark of the Ophir-Hill mine was recently invited to inspect the property and several changes were made in accordance with his sugges also recently conducted by Capt. Tibby a mining and metallurgical expert

MINING CONCENTRATES.

Ed Sheets, the broker, has gone to C .O. Ellingwood, secretary of the Western Exploration company, left for California today noon.

President McNeill of the Utah Copcompany will return to Colorado

Henry M. Crowther, managing direc-tor of the Blue Acre Copper Co., is in Beaver county.

An accident to the United States tramway at Bingham Saturday resulted in the piling up of a large number of buckets, which are said to be too large in proportion to the balance of the line. The company has had con-siderable difficulty in the past.

President Mucklow, Manager Alex-ander and other Majestic officials have returned from camp. W. J. Barnett is looking over the Loon

Creek, Idaho, mining region. The Sapho group of claims at Tonopah has been bonded by E. W. Griffith, for himself and associates. The price tipulated is said to be \$100,000. H. S. Joseph departed for Oregon on Saturday night to conduct an examina-

J. E. Bamberger, and son, Ernest, are at DeLamar, Nev., inspecting the great Bumberger-Delamar properties.

Col. P. C. Weber, the well known Ety, Nevada, citizen, who was in the city last week on mining business departed for Ogden yesterday afternoon and will leave there for home today.

Fred Nightengale, assistant secretary of the stock exchange, will spend his vacation of 10 days' duration in the canyons of the Wasatch range. Considerable interest is being aroused in South Swansea stock. The strike made on the 850 level of the mine on Friday appears to be quite important and the chances are that this Tintic mine will out the strike that the chances are that the strike will be the strike the strik

mine will cut quite a figure in the camp's output again. It is reported from Beaver county that copper sulphide ores have been en-countered on the 200 level of the Black-bird mine in Copper guich.

A party of officials of the New York Nevada Copper company passed through the city last week en route to Ely, Nev., the scene of the company's operations. A more energetic campaign is looked for in the near future than has prevailed for some time. In the party was Samuel W. Traylor, the company's consulting engineer. pany's consulting engineer.

Work still continues on the Irus mine and before long it is thought they will be employing four times their present force of men. Every foot of ore in the mine runs away up in gold, and that the owners have a bonanza goes without saying.—Stateline Oracle.

A large number of improvements are being added to the Johnny these days. The boiler room is being enlarged and the steam connections have been made with the big engines, so that there is a saving of about \$14 a day by not using steam from the number of the stateline. steam from the pump engine.-Stateline

William Curtis of the Glencoe proper-ties is down from Park City. W. L. Maas, the mining engineer, has

returned from a trip to California. P. W. Madsen, manager of the Century mine in Park Valley, has returned from a trip to the Yellowstone Park. He says conditions at the mine are in a very gratifying state.

Senator A. B. Lewis is expected to reach here from the east the latter part of the week.

To-day's Metals: SILVER, Bar, 53 1:2 cente ILAD. \$3.50. CASTING COPPER, 13 cents a fb.

SELLING WAS VERY HEAVY.

J. C. REYNOLDS IN THE CITY

MAY BE SOLD

Speaks of the Tooele County Camp-Work at the Honerine Drain Tunnel Progressing.

Said to be a Deal Pending for

This Stockton Properry.

BUNKER HILL

owner of the Bunker Hill property at Stockton, is in the city and while he was not ready to render a confirmation, the report is that the purpose of his visit from camp at this time is to close up a deal for the disposition of this valuable property to a syndicate of eastern gentlemen.

The Bunker-Hill is located south of the site of the former hoisting plant of the Honerine mine, which was destroyed by fire several months ago, covering extension of the main Hoperine vein.

"Everybody is playing a waiting game," is the way Mr. Reynolds expressed himself this forenoon, in speaking of conditions in the camp in genral. "Until the Honerine tunnel is ompleted sufficiently to unwater the

various mines the operators will not pretend to do much work."

The drain tunnel is completed to the length of about 5,000 feet and a tremendous volume of water is pouring out its mouth. For a time work was stopped in the face and the energies were directed in the driving of cross-cuts; but, Mr. Reynolds says, he was informed before coming to the city, that work had been resumed in the face again.

Plans are going ahead for the proposed concentrator and the work of building the plant near the mouth of the tunnel will probably commence at

MAJESTIC OF PARK CITY. New Company Beady to Commence Driving a Tunnel.

Preparations are about complete for

commencement of work at the property of the Majectic Mining company, recently organized to operate in Park The ground has already been explored to the extent of 350 feet, which includes a tunnel run for a distance of 66 feet. Assays of ores taken from this tunnel has discolsed values respectively as fol-

\$5 gold, 14 ounces silver; \$4.17 gold, and four ounces silver. It is the intention of the company to start an entirely new tunnel lower down on the property by which it will be pos-W. J. Lawrence left this morning for sible to attain a depth of 250 feet; at the same time cutting two ledges. The officers of the company are: Judge Marioneaux, president; Dr. H. A. Anderson, vice president; Dr. C. F. Pinkerton. secretary; C. S. Rohlf, treasurer and

manager GREAT IS THE GEMINI. Splendid Dividend Record - Only Sixty Men Emyloyed.

The dividend paying mines of Tintic for the official year ending Feb. 1, 1903, says the Tintic Miner, are led by the Gemini mine of Eureka, which has made good to its fortunate owners in the 12 months preceding that date over With this record the Gemini may be

With this record the Gemini may be classed as the leading mine of Tintic district, and it ranks well among the leading producers of the state, the production from which the above dividends have been paid being the result of the work of one shift of about 60 men. It is beyond contradiction to say that no other 60 men in the state, in the mining or any other industry have we are mining or any other industry, have, as a result of their labor, succeeded in obtaining the same net profits. And y ini have scarcely been touched, so rich is the product that goes to make up its wealth; and as a dividend payer during the present year it may easily be pre-dicted that the Gemini will lead not only Tintic district, but that its produc-tion of the precious metals will stand well to the front as compared with any other of Utah's leading mines. And bet-ter than all this is the fact that a new country is being developed to the north of Eureka that promises to be the greatest mining section of Tintic district.

BEAVER MINING NOTES. Eric Officials Visit Copper Region-Shaft at 312 Feet.

President Holbrook and Secy. Brown President Holbrook and Secy. Brown of the Eric company visited the property this week and were well pleased with conditions. The shaft has reached a depth of 312 feet and the force is cross-cutting for the vein on the 250 and 300 levels. Proximity to a large body of copper ore is indicated by the fact that the country rock is shot full of native copper. The officials are confident that they will develop a good mine. they will develop a good mine.
Louis E. Bamberger, the Sait Lake mining man, has been looking at properties in Star district this week.

Judge Botkin, who is president and general manager of the Catawba company, visited the property this week.

Will Hurst came down from Shauntie Tuesday. He is now surveying the Burning Moscow group for the Royal company.

J. O. Adams, formerly connected with the Majestic, returned yesterday from Cheyenne, and has gone up to the Imperial, where he will be engaged in the future.--Milford Times.

OLD ELMORE MINE. Property at Rocky Bar, Idaho, is to Be Reopened.

The old Elmore mine at Rocky Bar is the reopened, says the Boise States to be reopened, says the Boise Statesman. Pittsburg capital is to go into the famous property, and it is the understanding that it is to be explored very extensively. The arranging of this project has been in the hands of Irwin E. Rockwell, the man who has been so successful in reopening the Minnie Moore mine at Bellevie. Mr. Leech, who was connected with the mine in old days, is to be in charge of the work.

The Elmore is one of the most famous properties in the state. It was a very heavy producer for a number of years, the ore being rich and occurring in large bodies. That property, like so many others, got into difficulties when the lower zones were reached, where the ore had not been oxidized. It became impracticable to work the ore at a profit with the methods then available. ore had not seen examed. It became impracticable to work the ore at a profit with the methods then available, so the property was closed down, after making a sensational record, and has been idle

BEARS HAD IT

Made Continual Raids, Bringing Out Long Stocks.

Some Spasmodic Rallies Followed as A Result of Bear Element Doing ing Some Covering.

New York, July 13.-The market was lolently active and feverish during the first hour, with many stocks dropping weakly and others showing some evidence of support. Pennsylvania was sold down to 1194, a loss of 13. New York Central touched 1104, a point under Saturday's close, but was lifted in a spasmodic way, recovering to Saturday's level. There was evidence of support also for the United States Steel stocks and Reading. Declines of 1 to 11/2 were made by St. Paul. Missouri Pacific, Illiaois Central and Louisville, Wabash preferred, local trac ions and Amalgamated Copper. Some of the inactive stocks made wider de clines. Chicago, St. Paul, Minneapolis & Omaha broke 20. Recoveries of a point were made by New York Central, St. Paul, Wabash, Atchison and Canadian acific and the level of some stocks was brought back to about Saturday's close. The market became less active but was

feverish and unsteady. The professional bear traders continued heir raiding tactics under which heavy their raiding factics under which heavy offerings of long stocks were dislodged. Covering by the bears caused spasmodic railies. During the second hour selling was very heavy by Baltimore & Ohio, Reading and Southern Pacific at declines of 1½ to 1½. New York Central, Brook-Rapid Transit were carried 2 points under Saturday, Illinois Central 4½, Consolidated Gas and United States Express 3, Manhattan 2½, American Express 2¼, and Leather preferred 2. The weak stocks railied about a point on the covering movement and the market became less active but feverish and hesitating again. Lack-awanna, which sold at 24 on Saturday, sold at 2446259, and at 244 on successive 100-share transactions.

awanna, which sold at 24 on Saturday, sold at 244a250, and at 244 of successive. 100-share transactions.

Bonds were weak at noon, Wabash Debenture Bs dropped 23, Southern Pacific 4s 44, and United States Steel second 5s sold at 13%, a low record.

Another attack on the market after midday met with some resistance and St. Paul was the only important stock which sold lower than in the forenoon. Rallies were then inaugurated in various leaders and they rose rather sharply. Metropolitan Street rallway sold 4½ above its lowest, Delaware & Hudson 3, Illinois Central 2½ and the active list generally about a point. St. Louis and San Francisco first preferred droped 8 points, and St. L. S. W. preferred 3½.

Increased weakness was shown by the stock market in today's early dealings, and a number of issues, including some of the standard class, touched the lowest price in years. The opening was fairly steady with indications of good support, but values soon receded under the vigorous onslaughts of the bears, together with a renewal of last week's liquidation. London reported a weak and hesitating market for Americans.

Stocks that made heavy declines in the first hours included Pennsylvania, New York Central, Northwestern, Atchison, Rock Island, St. Paul, Illinois Central, Wabash, the tractions, Metropolitan

Rock Island, St. Paul, Illinois Central, Wabash, the tractions, Metropolitan, Manhattan and Brooklyn Transit and Amalgamated Copper.

The bonds of the United States Steel corporation went to the lowest point in their history. On the curb prices sympanized with the require received in the contraction of the curb prices sympanized with the require received. their history. On the curb prices sympa-hized with the regular market, Business was fairly large in volume and more stop-loss orders came out. Commission houses with middle west connections were prominent in the selling movement. Bos-ton sold largely. Aside from the general feeling of pessimism, there was no news to account for the weakness of the mar-ket and such encouragement as should have resulted from last week's favorable crop news was entirely lignored.

The end of the first hour brought a par-tial recovery in some issues and the vol-ume of trading diminished materially, but

They Came.

such little prices.

ONE

PRICE

the tone of the list continued feverish and unsettled.

A partial rally in the second hour gave way to another selling movement, in course of which prices fell to a lower level than at the opening. Baltimore & Ohio, Reading and Southern Pacific were the especial objects of interest. New York. Central. St. Paul. Illinois Central and Consolidated Gas all made further decilnes. To show the extreme sensitiveness of the market. Lackawanna jumped 6 points between sales of 100-share tots. The second decline was followed by another rally just before noon.

DENVER PRID GRANDE RIO GRANDE WESTERN

BURLINGTON EQUIPMENT

The Burlington has the best equipment made on all its through trains. The strongest cars, the biggest cars, the safest cars. It doesn't make any difference what kind of cars-coaches, chair-cars, tourist-cars, palace sleeping-cars-they're the best that money can buy.

It's the cheapest plan. We don't have break-downs from poor equipment, and our patrons Chicago flyers leave Denver 4:15

p. m. and 10 p. m.; to St. Joseph,

Kansas City and St. Louis 2:30 p. m. and 10 p. m. TICKETS. 79 West Second South St. R. F. NESLEN, General Agent.
